MIRC LogReader Full Product Key

mIRC LogReader Activation Code is a program to view your mIRC log files. It will scan your log folder for any files with the extension "*.log". It will read the log files in the same format that mIRC saves them. The program is fully multilanguage and supports standard format highlight with 80 unique mIRC colors. It has a calendar and you can edit the logfiles through the mIRC interface. How to use the program: 1. Run the program and check the section "Settings" on the main window. 2. Click the "Scan" button to start the scan and save the results in the default directory. 3. Select the file types you want to be scanned for, 4. Click "OK" and the program will begin the scan. 5. Once the scan is complete click "Start" again and click the "Save as" button. 6. Go to the directory where you saved your files and double click on the last file in the folder. 7. This will open the log file and show it in your default mIRC Viewer. 8. Click the arrow on the upper left corner of the text to change the font. 9. You can now edit the entire log file manually. 10. The program will scroll through the file for you. 11. You can also search for a specific word/pattern in the file using the standard mIRC search tool. 12. To re-enable the scan functionality simply click the "Scan" button. 13. The program will automatically download and install the next available update if a new update is available. mIRC LogReader Crack Mac Features: ▯ New improved Check for Updates feature ▯ Manage your scan results with the new "View" menu ▯ Edit the results ▯ Handles multiple scans with multiple files ▯ Scanner can be configured with the Scan Options button ▯ Can scan several directorys of log files ▯ Supports multiple mIRC languages ▯ Uses standard mIRC UTF-8 file encoding ▯ Fully UTF-8 supported ▯ Scan uses only one window ▯ Searches for single words (wildcard) in the files ▯ Supports up to 99999999 log files ▯ Shows the last 20 logs ▯ Shows a mini calendar ▯ Ability to view log files remotely on another machine

MIRC LogReader Crack With Product Key

* Quick and easy reading of multiple IRC log files. * Complete support for highlight and text formatting. * Scans multiple log directories. * Log files can be read in any order. * Keyword highlighting, users can tag logs by file or channel name * Calendar and search/filter for logs. mIRC LogReader Contents: mIRC LogReader, version 0.1a (twinks17) mIRC LogReader can read an mIRC log file. First run, mIRC will warn the user to install the LogReader component. mIRC then will look for the log file and install that log file into the mIRC Logs directory. Example log files are in this folder: C:\mIRC\Logs mIRC creates a database in the mIRC database directory if a log file is read. If you wish, you can rename the database file to a different name. mIRC will create the database file for you. If you do not wish to create a database file for the read log files, select the NO option on the "Add to database" when reading the log file. mIRC LogReader can be run using the GUI. - On the File menu, select the Read option. - A log file will then be opened in the LogReader application. - Select the Login tab. - A user has logged into mIRC. The server, username, hostname, and channel will be displayed. - Select the Log tab. - A calendar will be displayed for the logged in user. - A date filter can be selected. - You can also use a text filter. - Click on the "Read" link and mIRC will read from the selected directory. - The file is then read into the LogReader application. A notification is displayed on the main application. If it is a newly logged in user, the system "set" command to the PING channel is executed. - If the log file was read from a fixed directory (eg: C:\mIRC\Logs\), the "Set Directory" button on the main application will also execute the "set" command to the PING channel. - A few seconds later, a message is displayed in the LogReader application. This message has the current date and time at the top. - Your IRC client will be detached. - If you click

What's New in the?

========= mIRC LogReader is designed to be a simple little program for viewing several log files from mIRC. mIRC's log files are classified into different server folders depending upon which server and channel they belong to. The program will also display a calendar and a search/filter function for easy logging of messages. The log files being displayed by mIRC LogReader are sorted in the following way: - The log files in server directory are sorted in the same order as the text lines in the log file. - The log files belonging to a specific channel are sorted in alphabetical order. - A "Current Server" indicator is shown on top. - A "Current Date" indicator is shown on top. - A "logs Searched" indicator is shown on top. - The "Current" indicator is shown on top. Installation: ========== 1) Unzip the exe file into a directory of your choice. If you don't know where the directory is, go to "Programs and Features" in the "My Computer" screen, right click on the icon and choose "Properties". 2) Run the program. Click on the "New Server" button to open the server log dialog, pick a server and click the "Add" button. A new server will appear on the screen. Enter any necessary server and channel information in the corresponding boxes. Click the "Add" button to save the information. Click the "OK" button to add the server to the server log. Click the "Close" button to close the dialog. 2) For a manual installation, copy the "mIRC LogReader.logreader" into the "Desktop" directory of your choice. Usage: ===== Select Server Logs: You can use the following codes to view the log files: : # : # : # : # :
