With Auction Accountant you can: * Import/Export/Delete eBay auctions * Track eBay fees * Import/Export completed transactions to a customized database * Print, email, and save transaction data * Import/Export/Delete Paypal transactions * Generate invoices for eBay and Paypal payments * Track eBay sales * Generate custom reports * Easy import/export of completed transaction

data * Automatically record all eBay transactions * Track Paypal fees * Customized tables/reports * Unlimited accounts * Open source - Free to use Auction Accountant was built with transparency in mind, allowing you to view your transactions while they are happening! This plugin automatically updates itself every time you update the software, no need to do anything. No configuration required, just run Auction Accountant, connect to your eBay account and run. If you are using a Mac, be sure to add the plugin to your MacOS X Automator Application. The Automator will automatically install the plugin for you. If you are using a Linux distribution, the plugin will add a menu entry to your system's menu. You can then simply double-click that menu entry to run the software. There is a 5 day trial period during which you can try the software, including the usage of all features and databases. After that, you need to purchase a license for the software (we have a 3-month plan for $1 per transaction, a monthly plan for $9, or an annual plan for $99). Auction Accountant works on multiple operating systems. The MacOS X Automator or the Linux menu entry are only necessary if you

Auction Accountant

Add Email to Address Book with AutoFill - Add Email addresses to an address book (will work with the Address Book in Mail.app, Windows Contacts, Outlook, Windows Live Mail, Windows Live Mail for iOS, Blackberry, Android, Windows Phone,...), not only alphabetically but also by last name and then fill the entered name with email address and the typing will done automatically. Keymacro has a simple interface and very flexible. You can also set keywords for email addresses, define the first or last name of the address book, arrange your address book by last name, as well as use the "Match Text" function. Keymacro is written in Objective-C and uses Cocoa framework for the GUI and Cocoa address book support. Keymacro contains 40 emails, the first 10 of them are the default emails. The other emails are used as examples. Keymacro includes: - Add Email to Address Book with AutoFill - Add Multiple Email to Address Book with AutoFill - Add 1d6a3396d6

Auction Accountant License Key Free Download
