----- Linn Konfig is a free tool for Linn-based converters. You can use it to update the firmware on your Linn device and to restore the factory settings. General improvements, bugfixes and new features: • The DC offset adjustments can now be applied to Mono, Stereo and Dual Mono mode. • The DC-offset adjustments for mono are only applied when using the Mono mode and when using the upmixer to change the audio format. • You can now adjust the default values for the setting 'Rate'. (Mono Mode) • When using the Mono Mode in Mono and Stereo, the left stereo and right mono signal are mixed. This means that the left and right stereo channels are equalized and gain adjusted. • You can now choose to adjust only the left stereo signal when in Stereo mode. • The left stereo signal can be adjusted separately if you have separate left and right loudspeakers. • When using ALSA and PulseAudio, the overall gain now depends on the selected output device. • You can now specify the date and time for the file system backup/restore. • The original error message for the 'Upmixer' button is now shown in the Linn (instead of a generic error message). • You can now select the 'Auto power-on' method from the menu to display a dialog window when powering on your Linn. • For the 'Haptic' and 'LED' buttons: A new option is now available to allow you to lock the left and right LED buttons. Using the Upmixer: ----- You can now use the upmixer to change the audio format. The upmixer allows you to choose between (Mono, Stereo, Dual Mono) and the (Linn and Mono) and (MTP and Mono). Linn Da Capo DG 770's Upmixer screen: As shown in the screenshot, you now select the type of conversion you want. And you can choose Mono, Stereo and Dual Mono. Linn Da Capo DG 770 Upmixer: As shown in the screenshot, you now choose the desired Linn (Mono), MTP (Mono) or Dual Mono mode. Manipulating the Upmixer: ----- You now have the option to adjust the following settings: • Line-in: Adjust the Line-in level (0-100%). 09e8f5149f

So excited for the 2019 major and here's a bit of a recap of what we can expect! I'm not going to lie, as a personal fan of the major, a fan of the game, and as a person who watches major tournaments really closely, this is one of my favorite tournaments of all time. Another thing I find fun about 2019 is that the "Fair Play" rules will finally be implemented officially and we will have actual team penalties instead of Spirit Breaker with a team being rendered inactive for a certain number of years. As one of the only teams that could potentially take advantage of this is Phoenix1, I've been so excited for this and it looks like the practice matches are already underway. I hope you enjoy this article and I look forward to seeing what the 2019 major holds for us! Tesla announced the Model S, Model X, and new Roadster in 2010. (Musk images) Elon Musk's Tesla Motor Company just announced three
