Windows Experience Index Share is a small application that will share the Windows Experience Index data of your Windows 7 PC with others in the Windows Community. By installing this tool, you enable others to see your Hardware statistics in one glance. In this documentation, you will find the download link, installation instructions, and an overview of the application's features. Usage Instructions: You can install the WEI Share Product Key application on a Windows 7 PC with Internet connectivity. Once installed, it will connect to the official WEI site and download the latest WEI scores from that computer. If you want to see the scores from a different computer, you will need to install the application there, but simply connect to the download WEI site. You will receive your own WEI scores. Each computer will have its own unique data set of WEI scores. Find the lowest WEI score, and click the button. The score will appear in the table. Click the button to download the WEI share application data to your hard drive. In order to view your other WEI score data, you must have the WEI Share application installed on the same computer. Click the Download data button to download the scores you wish to share. The WEI Share application will then install a copy of your data to your local hard drive. Once installed, you will be able to view your WEI Share scores on your own computer. The latest version of the application is always available through the WEI Share website at www.weishare.com. Download Instructions: Downloading the WEI Share application is very easy. Follow these steps to download the application: · Click on the link to the application's official website (www.weishare.com) · On the download page, select the version of Windows Experience Index for your operating system (32-bit or 64-bit) · Click the Download button · Download the application to your computer Internet Connection Required: The Windows Experience Index Share application requires an Internet connection to connect with the WEI website. The Internet connection can be to a router, modem, or access point. You need an Internet connection on the computer running WEI Share to access the WEI Share website. WEI Share Version History: Below is

Highlights: Add a list of Windows 7 WEI subsystems to the Explorer "Details" menu. Add it to your favorite folder as a sortable list. Import WEI data from our service. Tagging: Tag new or existing Windows 7 WEI subsystems with this tool. Show the score for your WEI subsystems. WEI Results Summary: The WEI Summary page shows you the scoring for the Windows 7 WEI. Keyboard Shortcuts: [Win] - Open the WEI Summary. [Add] - Add a new WEI subsystem. [Import] - Import your WEI data. [Search] - Search for WEI results. [Export] - Export your WEI data. [Back] - Go back to the main WEI page. [Prefs] - Go to the User settings screen. License: This product is open source, released under a MIT license. To view the license see: [Клaviши Руководство: Страницы Техническая документация Приложение хабр Приложения](#) This is a small application designed to be a small tool for sharing your Windows Experience Index (WEI) scores from Windows 7 with others in the community. The data can be explored so finding the best scoring driver for your hardware is fast and easy. It was developed with Azure, WPF, and Silverlight. The Windows Experience Index ([link](#)) measures the capability of your Windows 7 PC through a set of diagnostics tests. The higher the score, the better your hardware. In the test, 5 subscores are given for these hardware categories; Processor, Memory, Graphics, Gaming Graphics, Hard drive. Your overall WEI score is the lowest of these five: a computer is only as good as its weakest link.
