How to launch a java application from command line using `**args`? Possible Duplicate: what is `args[]` in java? Is there anyway to execute a java application from command line and pass values to it? I want to launch this application from command line and then I want to pass the values to this application from command line. A: Use java

`-classpath "$JAR_PATH":*`

`"$JAR_NAME":*` In your case, you'd use something like: `java -classpath`

`"your/path/to/jars/*":* "mainClass":* -jar "your/path/to/jar/jarfile.jar"` As you can see,

---

you'll need to specify the location of both the JAR as well as the main class. Disclaimer: I haven't tested this solution.
