Development AutoCAD Crack Mac is developed by Autodesk as a Windows application. It is sold and distributed by Autodesk on CD-ROM disks or downloadable for PCs via the Internet. Etymology In Roman times, the prefix auto- meant self, in Latin it is used as the first element in auto-da-fe, meaning "judgement on oneself", or autem, "thymself". In English it is also a prefix to "autumn", a calendar year starting in September, which was named after the Latin word for "autumn", sexta. In the 1990s, AutoCAD was the first software suite sold on CD-ROM. In June 2007, Autodesk released AutoCAD LT, an inexpensive entry-level version of the software. It runs on Intel-based PCs, Macs, and Linux, and was designed to simplify entry-level use of the CAD software by removing features not required for a novices, and is intended as a training program. In September 2008, Autodesk announced plans to change the name to Autodesk AutoCAD, as it will remove the "AutoCAD" name and brand. The name AutoCAD is used only by AutoCAD for AutoCAD products. The original "AutoCAD" name came from the prefix "auto" from the Latin word for "self". It has been used in many other fields besides CAD. In September 2009, Autodesk launched the first version of AutoCAD designed to use Google maps, called Google AutoCAD. This makes it easy for architects and civil engineers to draw floor plans on a flat projection of the Earth. History AutoCAD was originally designed by Autodesk co-founder Roman Stanek in 1979. He set out to make a sketching tool for drafting engineers and architects to collaborate in a graphically-intensive environment. In 1980, Stanek and his partner, Alan Burkhart, presented it to a trade show. The software was written in assembly language, then ported to Motorola 68000 assembly language. The first commercial AutoCAD release was marketed to architects and engineers in December 1982. It started out as AutoView, with a unique client-server architecture and serial port. In 1985, Autodesk purchased the software from Burkhart and Stanek, and has since developed and maintained it. On December 12, 2012, Autodesk announced that Auto
