We appreciate your support.If you like Tarnished, please take a moment to leave a review on Steam.Thank you!From Zynga and our friends at Betaworks. Thank you for your interest. As previously stated, the game has not been ported to Android as of this time. We are working to do this and we will update with an announcement once it is available. I think I have a solution. Instead of us porting all the existing content, why not just create a new game from scratch, but with familiar content, similar with Total War, plus maps, leaders, and even heroes from the old game. (I would also be really sad if they port Tarnished to Android. I already have a lot of money invested into this game and was ready to drop 40 bones on an iPhone app for it. It was really the only thing I looked forward to playing when I heard they were splitting into two studios.) I don't think I would play a new game just with different assets. I would like the variety of the expansion but also the immersion of familiarity in the game. A lot of people were impressed when the Tarnished upgrade was released because it was an entirely new game with the same engine and assets as the original. Maybe they're listening to us.
