Warhammer: Chaosbane is the beginning of a new and exciting chapter in the Warhammer universe - a universe where humanity is nothing more than a frail and fragile shell for malevolent gods and races to play with. This DLC is great, I got all the characters I needed. It doesn't have all the skills (only for free right now), but I hope it will be there later. In my opinion, the Staff Assault bonus is the best of all... because it works with almost any other weapon. The thing I liked the most was the Freedom of the City. Yes, it's a kinda overpowered bonus, but it can be used without a problem. Well, it's a good DLC, but I don't know if I'm gonna get the Season Pass. Because... with all the other DLCs already released, I don't know... maybe I'll need all the DLCs... I don't know... I need to see... I can't decide whether to go for the Season Pass or not. I've been burned by GW in the past and just never understand how they behave. I get the impression they charge for every little thing that's released and don't include functionality with the content. I mean, this season pass is taking your choice away in terms of the rules and event cards. It's just their usual meaty stuff. There are so many base models, it's hard to tell if they'll have enough Chaos in them to make them all new. I'm hoping for some holiday DLC like space marines or Space wolves. I can live with the idea

In the Warhammer Universe, it is a time of great turmoil as the Warp spreads from the Mortal realms and threatens to engulf all creation. As a Nephalem hero, you must rise up and fight against the forces of Chaos, led by the legendary first Chaos God, Khorne, and his second-in-command, the Bloodthirsty Slaanesh, master of debauchery. *** A note on patching: Warhammer: Chaosbane was originally intended to be released as a traditional single-player experience with no multiplayer features. However, the overwhelmingly positive response to the game from multiplayer players encouraged us to add PvP support to the game, which we finished early last year. We are in the process of pushing Warhammer: Chaosbane out to all existing owners of the base game with all of the enhancements to enhance the single player experience. We hope you enjoy the content in the game and look forward to seeing you on the battlefield! Warhammer: Chaosbane - Gods Pack Review Warhammer: Chaosbane - Gods Pack Review We recently had the opportunity to review the Gods Pack for Warhammer: Chaosbane. This free DLC pack was made available on PlayStation Network, Xbox Live, and Steam. In this review, we will go over our thoughts on the content and value of the Gods Pack. This DLC pack includes a new divine skill tree for each of the playable character classes, giving each class a unique set of powerful skills that will allow them to work best in certain situations. Additionally, there is a new weapon type that gives the user a special effect when used, a new play mechanic, and a bunch of new and returning cosmetic items. The Gods Pack grants new and returning players the chance to play through the first half of the game as a new character, in addition to some challenges on the campaign map that will grant them Gods Tokens. For players who already own the base game, the Gods Pack offers a value of just under \$4 in value. The Gods Pack comes with full English, French, and Spanish language versions, and no German language version was available to review. About Newerth/Warhammer: Chaosbane The creators of the

What's new:

Vol. I Gods are born, gods are destroyed and gods are reborn... Whilst Warhammer Live Gods is a pleasant nod to the core God list, the new core set hasn't really changed the overall gameplay - it's just slightly changed which god is better than which other god. You need more troops than your opponents in general to win games, you have multiple points in the mid-game to buy troops, and you have a bigger budget to buy the most powerful troops. Good god choices beyond the core can provide better numbers or special abilities, but the core list always ends up being the biggest difference. With that in mind it's important to be asking yourself questions about your own strategy as you play. I haven't really been running many games with the core set up and mostly it's been games with a god in the mix. Even with all the diversity the core set isn't really suited to every situation, and as I've been playing it has prompted me to think about how my lists will cope with the core. Warhammer: Chaosbane favours the more combative styles. Warriors and Chaos Warriors excel at the more aggressive styles of gameplay, but I'm finding I'm running into them in situations where the Dark Elves can do a better job of answering the flanks, and the Undead are significantly better at contesting damage when superior numbers are out to deal with it. On the

positive side, I think the core set gods do favour the heroic style of gameplay, since all but Earthshaker can summon allies. But I'm doing better in games where it's more about control of the board, or less about winning the mid-game and starting an unstoppable momentum. Invaders were fortunate to play against one of the greatest heroes of the Chaos pantheon, with the ubiquitous Genestealer C'Tan. It's a good lesson on what opposing forces can offer in a game. The Warriors are a wonderfully undulating phalanx of stabbing death, moving up, left and right, on upwards of twelve hits-per-turn and can do fantastic damage if they're hitting on six instead of four. They're armoured so that they don't take a lot of damage, so it takes a lot to push them out, and Genestealer C'Tan is super-mobbed the whole game. But, yep, not the one that wins.
