What's new:

® - News News Archive In a preview of the Super Soccer 7 game due out this year, World of Soccer Magazine reports that Seagate will sponsor the game, starting with this year's Women's World Cup. "You can do lots of things with a game like this," said Seagate marketing director Mark Warman. "This is a global reach and not just a U.S. game — and a very user-friendly game. We're pitching it as the American game. I haven't seen any offerings anywhere that actually try to launch the game overseas. A new feature is the ability to manually change the player's energy level, giving players more control over how they go about their soccer drills. Seagate promotes the scoring system as 5 modes of play: Street Soccer, Holiday Tournament, Practice, Full Control and Training. "The most fun will be when you make a play and the defense has a man-to-man. It's tough to break through," said Warman, who noted that he is a

“devotee of the Women’s World Cup” who has played all 27 games over the last three tournaments. The game features the interactive stadium, complete with a loading system for adds and menus. Looking toward the future, Warman noted the current version is “simplified a bit” and will have “a whole new set of features,” including the ability to scan Internet-based scores against friends, versus players in the game and the results on the official U.S. women’s soccer federation website. The new release will also have improvements in ball physics. “It’
