### RCRM [32|64bit]

Improves your system and boosts gaming performance by letting you set custom resolutions. You can convert between common resolutions like 1024x768, 1280x1024, 1920x1080, 2560x1440, and 2560x1440 or use the app to generate custom resolutions based on your GPU scaling. The program features an easy to use interface that lets you convert from and to popular resolutions with just a few clicks of the mouse. It's easy to get started; just search through the resolutions in an aspect ratio group. Don't forget to enable GPU scaling if you want the program to work as intended. You can also specify the best supported resolution for your graphics card and display. Desktop and Laptop has been tested to work on Windows 10, 8.1, 7, Vista, XP. Features: Custom resolutions for your graphics card - set up the best resolution for your display. Aspect ratio scaling - the program will automatically detect the best resolution for your system from various screen aspect ratios like 16:9, 4:3, 16:10, 4:3 HD, 16:9 HD. Desktop and Laptop key features: Real-time resolution adjustment Full screen support Multiple custom resolutions can be applied Option to start with the best supported resolution Widescreen optimized screen mode 2560x1440 and 2560x1440-HD resolutions 18:9 screen mode (default) ASUS motherboards are generally easy to configure and install. Go ahead and check out our newest motherboard guide to help you pick the best ASUS motherboard for you. We have a look at the ASUS X99 Deluxe that comes with an AIO cooler and not a tower. We just didn't have any of those which is very rare indeed, so let's just get the jump on it. We found that the Arc, as a stand-alone graphics card, gets pretty well behaved. Sometimes it does its thing and sometimes it doesn't, but most of the time the graphics card works as it should. In fact we never had a single failure of the graphics card. Here's some basic information for you. Arc PCI-E Graphics Card Benchmark: The benchmark for the aforementioned graphics card was done in the game God of War, most demanding game and challenging game from the PlayStation 1 & 2 series. The benchmark was repeated 10 times and the average was used for analysis. Below 3a67dffeec

- Create and configure custom screen resolutions - Manage different set of multi-monitor configuration options like sync, dynamic re-sizing, etc. - Supports both aspect ratios 4:3 and 16:9 - Has a launcher icon and runs faster in terms of start-up compared to Windows 10's built-in screen resolution changer. - Auto-detects resolutions that Windows 10 won't take care of itself. - Icons and Desktop wallpaper customized for specific custom resolutions. - Option to apply system-wide resolutions to all users and sessions. - Simple yet effective. The following screenshots will give you some idea of how the application behaves and how its interface works. Miner X24E overclocked to 1.3GH/s and using a 4GB of Corsair Voyager XT RAM, I am using 1.5V 980Ti GPU in the ROG III GTX 1060 OC 6G. A lot of people are using the stock thermal paste or monoblock from ASRock, but I chose to use the silkscreened paste from EVGA. ASRock B360 Mini-ITX 990FXE motherboard, one of the first B360s around with an almost full complement of capabilities. Two PCIe slots where fitted for the GTX 1080 Ti Founders Edition GPU by EVGA. The EVGA cooler is no longer on the market, as EVGA has discontinued this card. The following is a bit of a rant... My last quote in this article was based on the mis-interpretation of the article I link to in the quote. I don't think it was intentional as both articles do in fact carry the same information. I know for sure that it was not an intentional mis-representation as the article I was referencing is 1 year old and the article I quote is only months old. Quote: The article claims that there are a lot of parents out there who are selling their kids APUs. Well, I have five kids, all with APUs. I think they are cheap too. I will agree that they don't have as much power, and so it's not a good gaming chip for kids. But, it's fine for any adult wanting an inexpensive PC. I'm not sure if it's intentional or not but I'm going to assume it is. We're hardly a family of five, we're more like four. The only one still with
