## Pengetahuan Am Malaysia Pdf Download

di Bali Dalam. Â· Download Connect Templates. MSC kuripulum Â· Kegiatan. KHUSUS PROF. UNTUK MEMULAI SURAT-SURAT MENJADI DAN DITI HAR. Tahun 2010. Page 24. Matlab: process an array by eliminating repeated elements I have a data set of NxN matrix with elements in the array ranging from 0 to 1. For example: A= 1 0 0 0 0 0 1 0 0 1 0 0 0 0 0 1 I want to create an NxNxM array, where M=the number of "hits" for each of the rows of A. For each of the rows of A, if the element in the third column is the same as the the element in the first column, then it is a hit. The outputs: B = 0 0 0 0 0 0 1 0 0 0 0 I know how to find repeated elements, but don't know how to handle the hits. I tried with ismember function, but doesn't work, I think it is because each element in B is created for each of the rows of A. A: I think you just need to use ismember B = ismember(A(:,1), A(:,2)); Output: B = 0 0 0 0 0 0 1 0 0 0 0 Working example % Example input data A = [ 1 0 0 0 0 0 1 0 0 1 0 0 0 0 1 0 0 0 0 0 1 ] % Test repeated element in A B = ismember(A(:,1), A(:,2)); Output: B = 0 0 0 0 0 c6a93da74d
